## The Eclipse D2

information and specifications

Need more production capacity?  
Then the Eclipse D2 is your solution!

24 white ink channels and 8 CMYK channels!

1 pass prints with both white and darker garments!!

Our refined Rip systems allow multiple images to be downloaded simultaneously to offer the worlds most reliable and fastest digital direct to garment printer.

There's no need to lay down a white then colour on two separate print runs. The Eclipse range will print 8 channels of white underbase 4 channels of spot hi-lites and CMYK, all on the fly per garment. That's a total of 32 heads in the eclipse 2D creating perfect prints.

Utilising all the features seen in the Eclipse D1, the Eclipse D2 is the answer to production and deadline difficulties with the ability to print up to 200 garments per hour (less for darker garments).

DON'T BE FOOLED - the Eclipse D2 will print staggering 300 x 400 mm print in under a minute! All at a staggering 1440 dpi resolution. Faster prints can be achieved with lower registration.

THE D2 IS THE ULTIMATE PRINTER!

Size	1900L x 1530W x 1300H
Nozzles	5760 nozzles (180 x 16 180 x 8 CMYK)
